

vs. strongest competitor

vs. RL policy

Single-skill robots, binary needs

25 robots, 50 tasks

50 robots, 50 tasks

CP-LNS

Single-skill robots, additive needs

50 robots, 50 tasks

tie Greedy restarts

Multi-skill robots, additive needs

25 robots, 50 tasks

Greedy restarts

50 robots, 50 tasks

Parallel CP-LNS

50 robots, 200 tasks

CP-LNS

150 robots, 500 tasks
(10 species)

Parallel CP-LNS

150 robots, 500 tasks
(5 species)

Parallel CP-LNS

how much shorter ALNS's plans are (%)

○ ALNS on 1 core for 2 s

● ALNS on 8 cores for B_1
